

Space-Age Extra Strong

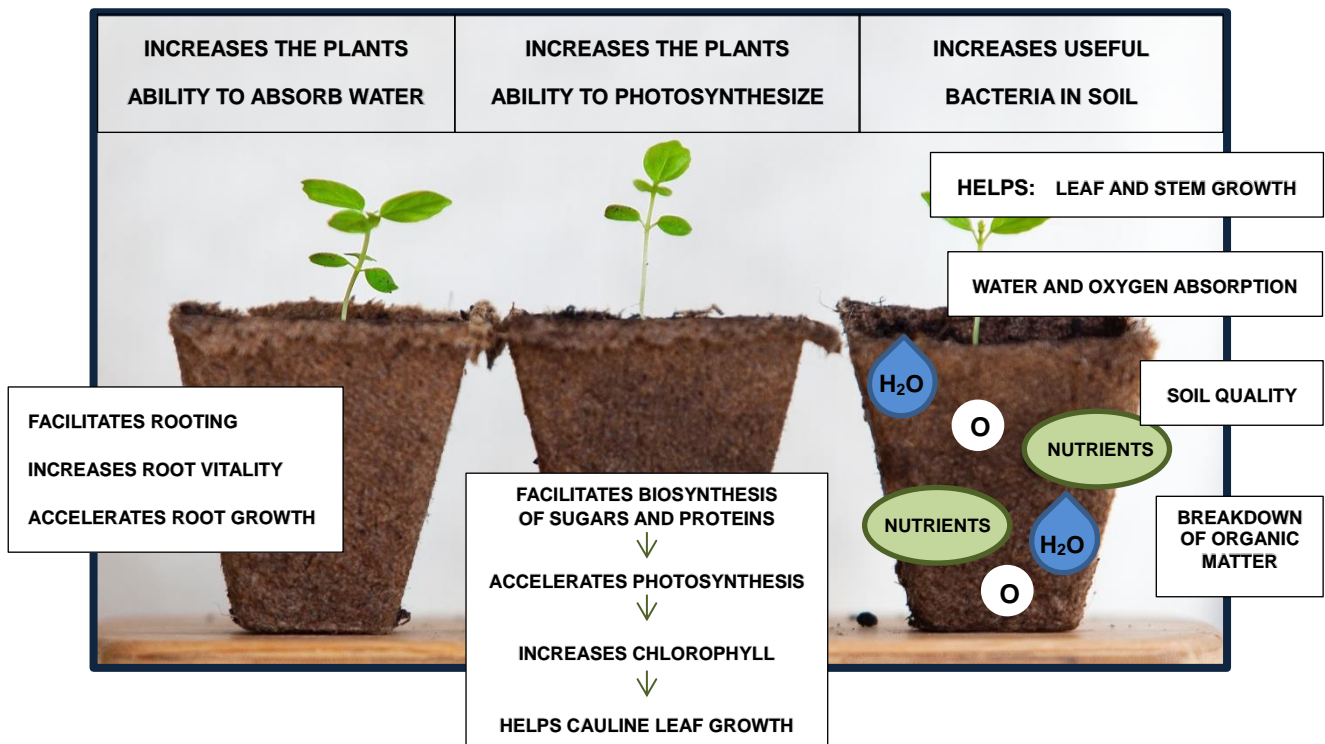

Micro-Algae Based Fertilizer
For All Your Plants' Nutritional Needs

NPK: 3-4-3 Net 1L

Space-Age Extra Strong: Special Features

The various active ingredients of Space-Age work together to stimulate the plant and supports nutritional balance.

- ✓ Increases flavor and sugar content
- ✓ Increases plumpness of fruits
- ✓ Prevents fatigue
- ✓ Improves seed quality

Directions for use:

- ✧ To promote rooting post-setting, maintain plant health, and in the case of insufficient sugar levels, irrigate using 500g (400ml) Space-Age per 1,000m².
- ✧ For foliar application dilute 1,000 times before use (100 liters of water per 80ml of fertilizer).
- ✧ Can be mixed with agrochemicals (except for alkaline products).

Usage: (adjust amount – dilution ratio, volume, treatment interval, frequency – according to plant health)

	Application per 1,000m ²	Estimate application frequency					
		Fruit & veg	Green veg	Root veg	Flowers	Fruit trees	Tea bushes
Seedling	Dilute by 1,500~2,000 Foliar application/Irrigation	10 times daily	10 times daily		10 times daily		
Planting	Dilute by 1,000 Pre-planting: soak Post-planting: irrigate	All 1 time	All 1 time		All 1 time		
Growth	Dilute 1,000 Foliar application	10 times daily	Initially 10 times daily	2 times	10 times daily		
	500g Irrigation		1~2 times initially		1~2 times		Once
Flowering	Dilute by 1,000 Foliar application					3 times	
Fruit	Dilute 1,000 Foliar application						
	500g Irrigation		Once initially				
Harvest	500g: Irrigation						
Post-harvest	Dilute by 1,000 Foliar application					2~3 times	2 times
Germination	500g: Irrigation (dilute by 2,000)					2 times	2 times
Poor growth Fatigued Light starved Post rain	Dilute by 500~1,000 Foliar application 500g: Irrigation	Foliar application 2~3 times daily over a period of 2~3 days. Irrigate 2~3 times daily over a period of 5 days.					

Caution:

- Store in cool and dry place and avoid direct sunlight.
- Do not store at sub-zero temperatures or let freeze.
- Use diluted fertilizer within 1 day.
- Keep away from children.
- Before combining with agrochemicals (pesticides, germicides) dilute according to specified amount and concentration, and then add the mixture to the diluted Space-Age.
- **Warning! Do not combine with alkaline agrochemicals as this could result in the creation of toxic fumes.**
