

Organic liquid fertilizer (65% organic nitrogen)

Heart of Flavor

With amino acids for enhanced color, flavor, and disease resistance.

NPK: 5-5-3 Net 20kg

Features:

- ✓ The main ingredient is an extract of fish-meal containing abundant absorptive amino acids.
- ✓ A concentration of around 100kg of fish-meal is used per 20kg of fertilizer.
- ✓ The contained nitrogen, phosphoric acid, and potassium increase the plants absorption of nutrients, accelerating growth.
- ✓ The amino acid works to stimulate improved color, shape, and sugar content.

Directions for use:

- Estimate 5~10kg per 1,000m², and apply during irrigation.
- Dilute the dose 500 times for foliar application during the cultivating season (of strawberries, tomatoes etc.). When using overhead irrigation estimate 10kg per 10 acres.
- Dilute the solution by 500~1,000 times for defoliating plants, evergreen fruit trees, or tea trees, as well as for foliar application during the cultivating season of these types of plants.

Milligrams of amino acids per gram of fertilizer:

Amino acids	Content (mg/g)
Glutamic acid	101.1
Lysine	14.10
Alanine	13.00
Leucine	11.34
Aspartic acid	10.90
Proline	10.17
Phenylalanine	8.17
Glycine	6.97
Isoleucine	5.65
Histidine	5.20
Methionine	2.25

Caution:

- This product is mildly acidic (ph. 5.0). Should the liquid get in your eye or come in contact with your skin, please rinse the affected area immediately.
- Do not use this product for other purposes than its intended purpose as a plant fertilizer.
- Please shake the container before use. As amino acid is indissoluble it may settle on the bottom of the container. Separation does not indicate a quality issue.
