

AGRI-G no.2

ENRICHED WITH **AMINO ACIDS**
FOR **IMPROVED COLOR AND TASTE**

NPK: 8-2-5 Net 20kg

Features:

Agri-G no. 2 contains highly absorptive amino acids that will enhance the activity of the plant and support its healthy growth.

Effect:

- ✓ Ingredients include nitrogen, phosphoric acid, and potassium, which are all water-soluble, and facilitate growing conditions and increase the plants ability to assimilate nutrients.
- ✓ The amino acids work to stimulate increased sugar content and assist in the production of plump and colorful produce.

Directions for Use:

- Estimate 5~10kg per 1,000m², and apply during irrigation.
- Dilute the dose 500~700 times for foliar application during the cultivating season (of strawberries, tomatoes etc.). When using overhead irrigation estimate 10kg per 10 acres.
- Dilute the solution by 500~1,000 times for defoliating plants, evergreen fruit trees, or tea trees, as well as for foliar application during the cultivating season of these types of plants.
- ✧ Agri-G no.2 will contribute to smooth operations as it does not clog up irrigation tubes or sprinklers.

User warning:

- This product is acidic. Should the liquid get in your eye or come in contact with your skin, please rinse the affected area immediately.
- If combined with a mixture of lime and sulfur, this could result in the creation of toxic fumes. Please refrain mixing this product with other products as this could be dangerous.
- Do not use this product for other purposes than its intended purpose as a plant fertilizer.
